GanttControl Installation Guide for Delphi

Step 1 Uninstall any previously installed GanttControl (WeiseGanttSuite) components:

- In Delphi, go to Component - Install Packages menu. From design-time packages list select WeiseGanttSuite and click Remove. Go to Tools - Environment Options - Library page, and remove the WeiseGanttSuite directory from library path.

Step 2 Shut down Delphi and other applications.

Step 3 Download and extract the GanttControl.Zip to a desired installation directory.

Step 4 Start Delphi

- In Delphi, go to Component | Install packages | Add... . Select GanttSuiteVCL_D[Version*], according to your Delphi Version
- Set the library path in Delphi: Go to Tools | Environment options | Library and add to library path the path you have installed the component.
